Experience an overview of how the Architecture & Design Industry is creating positive environmental change. You have likely heard the phrase “reducing our Carbon Footprint”. This event will explain the new term “Handprinting” and how it is taking us to the next level of sustainability.

This presentation will be held in the newest high school in the Olathe Public School District, Olathe West. The school was designed to create an innovative and futuristic learning environment for students. Olathe West is home to the Green Tech Academy, and is one of the only programs in the nation where students specialize in sustainability and renewable energy. Don’t miss the opportunity to have a student-led tour of this unique school.

Light refreshments will be provided

Presented by Beverly McAuley
EMN, Living Future Ambassador Presenter

April 4, 2019 6:30 - 8pm
Olathe West High School
2200 W Santa Fe St, Olathe, KS 66061
